- 21 dB Noise Reduction Rating (NRR)
- Bluetooth® VER 5.0 Sync to wireless devices
- Easy to use Bluetooth® controls integrated into the headset
- Digital Sound Compression ideal for outdoor shooting and hunting, for amplification of sound while reducing harmful noise from impulse sounds such as gun fire
- Five times sound amplification enhancing low level frequencies.
- Separate Volume Controls for Bluetooth® and external environment amplification
- 2 High Gain Omni Directional Microphones
- Recessed microphones reduce wind noise while providing directional sound, allowing the user to easily identify sound's origin
- Features AIR FLOW CONTROL that allows for a slim low profile ear cup design ensuring firearm stock clearance
- Adjustable headband now available in two different sizes for a more custom, secure fit
- Compact folding design for convenient storage
- Automatic shut off engages after 4 hours to conserve battery life
- Rechargeable Lithium Ion Battery with Micro USB Recharging Cable
- Replacement ear cushions ([see page 4](#))

IMPACT[®] SPORT IN-EAR HEAR-THROUGH PROTECTION^{WITH} AMPLIFICATION

UP TO 6X SOUND AMPLIFICATION OVERRIDE

When the electronic ear plug headphone is switched on, it is set at a safe 85 dB sound level and provides protection from loud external sounds while enhancing natural hearing. This allows the ear to hear important commands on the range, and crucial environment sounds when hunting. Eight different volume increments are provided above safe 85dB initial power on level to optimize hearing in the field by providing up to 6X sound amplification. In continuous noise environments, the device should be used in passive mode for maximum continuous protection.

- Noise Reduction Rating (NRR): 29dB
- Hear-through volume control
- Realistic, natural hear-through functions with digital circuitry
- 9mm Dynamic range speaker
- 2x Omni-direction in-ear microphones
- In factory setting mode, device actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85dB
- Run-time of 50 working hours
- USBC Rechargeable with a charging time of 2 hours
- Unit Battery Type: 200mAh Lithium Battery
- Flexible, moldable earhook

STYLE #	COLOR	QTY/CASE	UPC
R-02700	OD GREEN	6 per Case	033552027003

FEATURING

- Realistic hear-through audio
- 85dB sound compression
- USBC rechargeable battery
- Cable included
- Includes carrying case

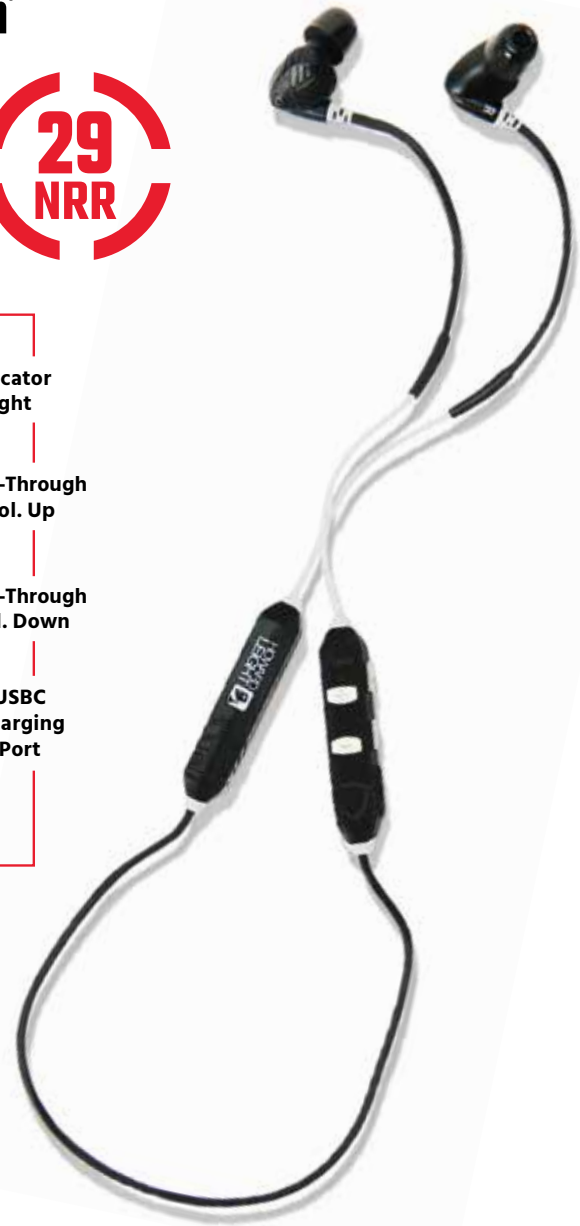

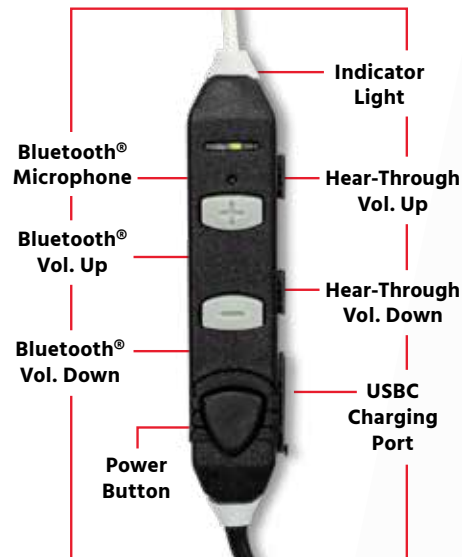

IMPACT[®] SPORT IN-EAR HEAR-THROUGH PROTECTION WITH Bluetooth[®]

When the electronic ear plug protection is worn properly, it provides passive protection of 29dB. When switched on, Bluetooth[®] and listening circuit are both turned on, and the device employs built in omni-directional microphones that amplify ambient sounds to a safe 85dB. This allows the ear to hear important commands on the range and crucial environment sounds when hunting. It also actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85 dB. The Bluetooth[®] connection is searchable using your input device.

**29
NRR**

- Noise Reduction Rating (NRR): 29dB
- Individual and simultaneous Bluetooth[®] VER 5.0
- Separate volume buttons for Bluetooth and Hear-through control
- Realistic, natural hear-through functions with digital circuitry
- 9mm Dynamic range speaker
- 2x Omni-direction in-ear microphones
- Device actively listens and automatically stops amplification when loud impulse sounds like firearms discharges exceed 85dB
- Run-time of 10 working hours
- USBC Rechargeable with a charging time of 2 hours
- Unit Battery Type: 200mAh Lithium Battery
- Flexible, moldable earhook
- 3 Pairs of Foam Eartips (Small, Medium, Large)
- Cable included
- Includes Carry Case

STYLE #	COLOR	QTY/CASE	UPC
R-02701	BLACK	6 per Case	033552027010

BENEFITS OF BLUETOOTH

- Reconnect to known devices very fast
- Level controlled so that it is not too loud while used simultaneously with hear-through
- Independent volume control of BT volume
- Data speed up to 2 Mbps, which is twice the speed of 4.2. Higher fidelity audio
- Low energy functionality for all connection to devices resulting in lower power consumption

IMPACTTM PRO

HIGH NRR ELECTRONIC EARMUFF

- Voice amplification for communication the range.
- 4 hour auto shut-off extends battery life.
Last approximately 350 hours
- Easy access external battery compartment
- Single knob for on/off and volume control
- Rubberized pressure points will prevent
gunstock scratching
- Connects to MP3 players and smart phones
- Includes 2 AAA batteries and 3/5 audio input
connection cord
- Replacement ear cushions (**see page 6**)

TRUSTFIT™ POD

Howard Leight Trustfit Earplugs are suitable for use as shooting earplugs at the range or hunting earplugs in the field.

- Soft foam dimpled tip
- Push-in foam earplug, no rolling required
- Reusable for up to 5 days

EASE

The soft foam with dimpled tip collapses to be easily pushed into the ear without the need to roll-down.

COMFORT

The contoured paddle fits naturally between the finger and thumb. Its flexible stem material gently pushes the dimpled foam into the narrowing ear canal.

TRUSTFIT™ POD UNCORDED

- Reduces haze and glare in outdoor applications

HydroShield Anti-Fog Coating

Permanently bonded to the lens, featuring dual-action properties that keep lenses clear up to 60X longer than our next best coating

Hydrophilic Action

Moisture is absorbed by the lens

Hydrophobic Action

Water droplets form and are repelled to the sides of the lens

TODAY'S ANTI-FOG

Regardless of application or environment, foggy lenses are the number one challenge for users of shooting protective eyewear. Lenses fog for a number of reasons, all of which are related to temperature and humidity. When sudden changes in temperature occur, small pockets of moisture condense on the lens, causing a hazy-white fog to form.

The Most Common Causes of Fogging Include:

- Transitioning between warm and cool environments
- Physical activity and exertion
- Environmental and weather conditions

Anti-Fog Re-Engineered

- The dual action HydroShield anti-fog lens coating provides up to 90X longer lasting fog-free performance*—even after extended wear and repeated cleanings
- Provides 2X greater scratch-resistance* than our next best anti-fog coating

HydroShield Lens

- Delivers CONSISTENT fog free time of greater than 180sec
- No application or maintenance needed
- Meets or exceeds ANSI Z87+ impact standard
- Offers 99.9% UVA/UVB protection

*HydroShield performance is based on independent lab tests when compared to median test results of other Uvex anti-fog coated products under the EN166 and EN168 testing standards

*Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application

UVEX HYPERSHOCK™

- Uvex Hypershock™ eyewear delivers the ultimate combination of high-performance protection and aggressive sport-inspired styling.
- The full frame design offers high impact protection, with streamlined padded temples and a molded nosepiece for a secure, comfortable fit.

LENS

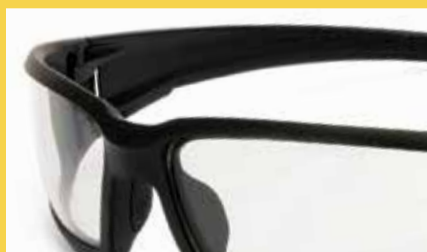

- Comes in a wide variety of lens tints
- Ideal for indoor/outdoor environments including hot, humid conditions
- 100% dielectric. Can be worn in environments where accidental exposure to electrical charge is possible
- Meets the ANSI Z87+ High Impact Standard
- Offers 99.9% UVA /UVB protection

Integrated hinge mechanisms with dual cam action

Soft, molded inserts along the temple provide a comfortable and secure fit

Lightweight, wrap-around frame is engineered to fit a wide range of workers, providing increased coverage, side protection and superior peripheral vision

90X ANTI-FOG 2X SCRATCH RESISTANCE

- The dual action HydroShield anti-fog lens coating provides up to 90X longer lasting fog-free performance*
- Hardcoat Coating provides long lasting 2X scratch-resistance from scuffing and scratching*

*Comparative lens life test performed using a Bayer Abrasion Test method and may vary between environment and application
